

SHOP-FLOOR ECONOMICS

Stop Farming Out Your Margins—Bring Crankshaft Grinding In-House.

Control turnaround times and rebuild profits with Robbi REX grinders: Italian precision backed by Atlanta-based technical support.

0 Days	Sub-Micron	Atlanta
VENDOR WAITING	JOURNAL ACCURACY	SPARE PARTS CACHE

You can't hit firm delivery commitments when your customer's crankshaft is buried in someone else's backlog. That's shop-floor reality. Every outsourced shaft forfeits turnaround control and hands your margin to an outside vendor.

✕ OUTSOURCING YOUR GRINDING	✓ IN-HOUSE ROBBI REX
2–4 week vendor backlog	**Same-day floor scheduling**
Outsourced markup cuts rebuild profit	**Retain 100% of the grinding margin**
Zero quality control over outside tolerance	**Vibration-free monolithic cast iron precision**

Cast Iron Foundation

Single-piece cast iron bed eliminates chatter and deflection, holding tight tolerances journal after journal.

Rapid 2-Key Setup

4-way cross-slides with rapid hydraulic traverse speed up centering—keeping chips flying instead of wrestling chucks.

Atlanta Backbone

Bypass 12-month import delays with showroom-ready iron and domestic spare parts support.

Scale to Any Shaft

From high-performance automotive up to massive 12-meter industrial shafts, configure manual or CNC control to match your floor.

"Look, we've all seen cheap iron cost double its invoice in scrap, lost hours, and alignment headaches. Heavy build over cheap alternatives wins every single shift. At the end of the day, owning the machine means owning your schedule."

Call our Atlanta shop floor directly at **770-279-2001** to talk center distance, swing requirements, and how Section 179 tax deductions simplify acquisition.
